- the two numbers following each element define its "cardinality" (minimum and maximum number of occurrences); the minimum equal zero indicates that the element is optional, the minimum greater than zero indicates that is mandatory;
- the bold character denotes the complex elements (aggregates of simple elements) that were built for the sake of functionality and re-usability of some complex informations sets. The child elements in each parent element are easily spotted as "indented";
- the symbol "@" denotes an attribute of the preceding element; here "the usage indicator (optional, required, ...)" is shown in square brackets.

## 2.2 Detailed description of document elements

Following tables show all elements (complex and simple) used in this document. Description includes: 1) element's information: xml tag, name, brief description, data type and syntax constraints; 2) information about use of the element in a particular position in the document: xpath and possible associated notes.

### 2.2.1 Complex elements (Aggregate Business Information Entities)

Complex elements are those elements whose content is composed of other elements (childs). Complex elements are alphabetically ordered.

<p><b>acsCode</b></p>	<p>full codification identifying an accessory product usually coupled with garment or other fashion product  (XPath SEInformationSupply/ProductIdentification/acsCode) 1-2  - note: <i>this element can have two instances only if the numbering organisations are different</i>  (XPath SEInformationSupply/socialAndEthicalSpecificInformation/assessmentStudyDocument/ProductIdentification/acsCode) 1-2  - note: <i>this element can have two instances only if the numbering organisations are different</i>  (XPath SEInformationSupply/billOfComponents/productComponent/acsCode) 0-2  - note: <i>this element can have two instances only if the numbering organisations are different</i>  (XPath SEInformationSupply/organisationDescriptor/socialAndEthicalSpecificInformation/assessmentStudyDocument/ProductIdentification/acsCode) 1-2  - note: <i>this element can have two instances only if the numbering organisations are different</i>  (XPath SEInformationSupply/organisationDescriptor/listOfFacilities/facilityDescriptor/assessmentStudyDocument/ProductIdentification/acsCode) 1-2  - note: <i>this element can have two instances only if the numbering organisations are different</i></p>
<p><b>activityLocation</b></p>	<p>data relating to a place where activities take places (indicate at least element location or address, city and country)  - base type: Nad,  (XPath SEInformationSupply/processStepsList/processStep/activityLocation) 0-99  - note: <i>Here filling location, country and subcountry is enough.</i>  <i>When the activity is carried out in more than one location, indicate what percentage of the total is carried out at each one</i>  (XPath SEInformationSupply/organisationDescriptor/listOfFacilities/facilityDescriptor/processStepsList/processStep/activityLocation) 0-99  - note: <i>Here filling location, country and subcountry is enough.</i>  <i>When the activity is carried out in more than one location, indicate what percentage of the total is carried out at each one</i></p>
<p><b>assessmentStudyDocument</b></p>	<p>resulting study document (e.g. an LCA study). It can be related to a component or a product. It can be a dataset (in any format) or a report according to isStudyDataset flag). ### **SEInformationSupply/organisationDescriptor/**

**listOfFacilities/facilityDescriptor/facilitySustainabilityCharacteristics/billOfWasteWater/facilityLocation (data relating to a place of a facility (indicate at least element location or address, city and country))**

Usually indicate the reference year for the collected figures. On the other side productReferenceQty should be ignored when figures are related to a facility.
